DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

2. Group I, claims 1-5, drawn to a method for isolating proteins involved in recognition and transport of a pathogenic plant virus.

Group II, claim 6, drawn to proteins involved in recognition and transport of a pathogenic plant virus.

Group III, claim 7 drawn to the application for cloning resistance genes using proteins involved in recognition and transport of a pathogenic plant virus.

Group IV, claims 8-14, drawn to cDNA encoding proteins involved in recognition and transport of a pathogenic botanical virus.

3. The special technical feature of Group I relates to isolating viral recognition and transport proteins using an anticapsid monoclonal antibody in a Western blot analysis.

Groups II and IV fail to incorporate the special technical feature of Group I. Groups II and IV are directed to proteins and nucleic acid sequences respectively. Thus, Groups II and IV fail to include a method step wherein viral recognition and transport proteins are isolated. Group III also fails to share Group I's special technical feature. Group III is directed to a method of applying viral recognition and transport proteins to cloning resistance to pathogenic viruses. Hence, Group III does not include a step wherein viral recognition and transport proteins are isolated.

Art Unit: 1648

Group II can also be distinguished from Groups III and IV. Unlike the polypeptide of Group II, Group III is directed to a method of applying viral recognition and transport proteins to the cloning of genes resistant to pathogenecity. Group IV is also distinguished from the polypeptide of Group II in that Group IV is directed to a nucleotide sequence.

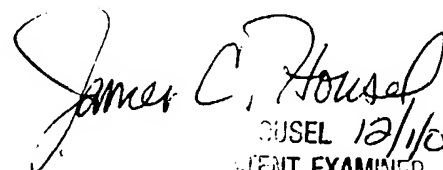

Finally, Group III can be distinguished from the cDNA of Group IV in that Group III is directed to a method and therefore fails to include a product comprising a cDNA sequence.

4. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
